To Whom It May Concern

Easteel Industries Limited have used the services of Richard Hyde for many years now for transport of heavy and difficult loads throughout New Zealand and Australia. More recently Richard has also coordinated movement of goods for Easteel from China to New Zealand including inland transport within China.

Easteel have no hesitation in recommending Richard and his team at GlobalTransport to anyone that requires expert skills and equipment to move machinery and equipment within New Zealand and around the globe.

Easteel have every intention to use Richard and his team for future work and wish GlobalTransport the very best for the future.

Yours faithfully

David McGregor  
Director
